

Adolfo Torcicollo

Full-Stack Developer | Swift · Kotlin · Java · C · SQL

Torcy.ado@gmail.com | torcy-it.github.io | (+39) 366 417 0900

EDUCATION

Apple Developer Academy · University Federico II · Naples, Italy

Oct 2025 – Ongoing

iOS development and applied design thinking program. Built and published iOS apps, 2D and AR experiences on the App Store covering the full product lifecycle — from ideation to release — through Challenge-Based Learning in multidisciplinary teams.

B.Sc. in Computer Science · University of Naples Federico II

2020 – 2026*

Focus on software engineering, data structures & algorithms, databases and networks.

*Extended duration due to an Erasmus exchange (2023–24) and a curricular internship (2025).

Erasmus Exchange Programme · Universidad de Oviedo · Spain

Sep 2023 – Jul 2024

Full academic year conducted in English and Spanish. Collaborated with international and intercultural teams, developing conflict management and cross-cultural communication skills.

PROJECTS

Thesis – TorciMail · Full-Stack Swift

2025 – 2026

Independent design and development of an iOS client for certified email and its Vapor backend. · Swift 5/6, SwiftUI, Vapor 4, JWT, Combine, Keychain, Docker.

- Full-stack architecture: SwiftUI client (MVVM, Repository, Mapper) + Swift Vapor backend as a secure middleware layer.
- JWT session management with iOS Keychain and thread-safe actor-based server-side state for credential encryption.

Lumi: World of Fables · iPadOS · SwiftUI / RealityKit

2025 – 2026

Educational iPad app with interactive storytelling, drag-and-drop mechanics, and an AR book. Accessibility validated with the SInAPSi Centre (Federico II).

- Designer-developer role: Figma prototyping + AI-generated assets (ChatGPT/DALL-E). AR page-fold shaders in RealityKit and dynamic audio via AVFoundation.

DietiEstates25 · University Project · Kotlin / Ktor

2024 – 2025

Full-stack real estate platform for agencies, agents and clients. Ktor (Kotlin) backend, Android client with Jetpack Compose, OAuth authentication (Google, GitHub, Facebook), map-based advanced search, weather forecasts (Open Meteo) and nearby services lookup (Geoapify).

Tic Tac Toe TCP · University Project · C / Kotlin

2023 – 2024

Networked game with a TCP server written in C (containerised with Docker) and an Android client in Kotlin + Jetpack Compose.

Music Player · University Project · Java / SQL

2022 – 2023

Information system for music library management: relational SQL database, Java GUI application (Swing/JavaFX), listening statistics and multi-user management.

EXPERIENCE

Curricular Internship · Namirial S.p.A · Naples, Italy

Mar 2025 – May 2025

Developed a full-stack mobile solution for certified communications using the Evcertia REST APIs within an Agile team.

- API validation with Postman and Swagger; Vapor (Swift) backend as middleware; iOS Swift client with MVVM architecture.

SKILLS & LANGUAGES

Programming Languages: Swift · Kotlin · Java · C · SQL

Frontend / Mobile: SwiftUI · Jetpack Compose · SpriteKit · RealityKit · SwiftData

Backend: Vapor (Swift) · Ktor (Kotlin) · C (TCP/server) · REST API · JWT · Docker

Databases: SQL · NoSQL · SwiftData

Tools: Xcode · Git · GitHub · IntelliJ · VS Code · Postman · Figma

AI-Assisted Development: Cursor · ChatGPT/DALL-E · Claude · Gemini

Languages: Italian (native) · English (B2) · Spanish (A2)
